

KELLER SHELLS

VSS Maple Kwik Ship Program

Keller Products is pleased to offer a quick ship stocking program. Our shells are constructed from high-quality North American Maple. These shells will all be produced using our VSS™ technology.

VSS™ or "Vibrating Sound Source," is a Keller Products patented innovation that enhances the integrity and strength of our drum shells. We use space-age technology to condition each VSS™ shell, resulting in regenerated vibrations that elevate head response and increase drum performance.

These shells are in stock and can be shipped within 1-2 business days of your order (providing payment has been arranged).

- No Minimum order; however, a \$25 handling charge will be applied to orders of less than \$250.
- These are our stock sizes. We will gladly cut them down to your desired length at no extra charge.
- These are the only diameters and plies offered on this KWIK Ship program.
- All pricing FOB our factory, Manchester, NH.

We continually look for ways to improve our customer service while providing more value to our valued customers!
